

# Bluetooth Logs

For issues with Bluetooth on macOS, please follow the instructions below to gather logging.

## Instructions

1. Execute this command in Terminal.app (/Applications/Utilities/) while the issue is occurring:

```
sudo /System/Library/Frameworks/IOBluetooth.framework/Resources/BluetoothReporter
```

2. Attach the BluetoothReporter diagnostics .zip archive located here:

```
/private/tmp/BluetoothReporter//system_logs.logarchive
```
